The product has expanded from 4 language pairs available for study to 2500.

The Chrome store has given the browser extension a Featured badge.

Typescript, Javascript, React, Redux & MobX, Node.js(proxy and microservices), React Native, Kotlin, Websockets(Socket.io), Less

Jan 2022 – Apr 2022

Orby

Fullstack developer

- Development of the MVP which provides 3D spaces for virtual exhibitions.
- Frontend of the application development.
- Development of a backend part of the app.
- Development and optimization of 3D spaces using Three.js .
- Discussing and thinking over the product functionality.
- Interaction with the target audience.

Typescript, Next.js, React, RTK, Three.js, Webpack, DRF(DjangoRestFramework), PostgreSQL

Sep 2020 – Dec 2020

VizorLabs

Frontend developer

- CRM development for conducting machine learning analysis of restaraunts visitors or employees of enterprises.
- Displaying a large amount of statistical data in graphs, charts, and heatmaps .

Typescript, React, Redux, D3.js, Emotion

2015 – 2019

Personal projects

ComicsKing

- Development of the backend of the application on Django.
- UI/UX design development.
- SEO-optimization.
- Development of an adaptive interface.
- Parsing a large amount of data.
- Setting up teaser ads campaign.
- Setting up Google Analytics.
- Basic server setup (Nginx, uWSGI).
- Improving performance in Google PageSpeed Insights.

On the main keywords the site was in the first three lines in all search engines.

The number of unique visitors of the web application per day averaged 20 000.

Javascript, Jquery, Django, PostgreSQL, beautifulsoup4, Bootstrap 4

Vk.Spy

- Parsing a large amount of data.
- UI design development.
- Basic server setup (Nginx, uWSGI).
- Deployment of the service in the .onion zone.

There were 200+ million records in the project database for which operations were performed.

Django, Selenium, PostgreSQL, VK API, onion

Ornatu

- Development of an anonymous online chat.
- UI/UX design development.
- Development of an adaptive interface.
- Development of the backend of the application on Node.js .
- Basic server setup (Nginx, pm2).

Javascript, Jquery, Node.js, MongoDB, Socket.io

ComicsPro

- Development of the backend of the application on Wordpress.
- UI/UX design development.
- Development of an adaptive layout.
- SEO-optimization.
- Setting up teaser ads campaign.
- Setting up Google Analytics.
- Basic server setup (Apache).
- Improving performance in Google PageSpeed Insights.
- Changing the domain without compromising the search ranking.

The number of unique visitors of the web application per day averaged 10 000.

Javascript, Jquery, PHP, MySQL, Wordpress, Bootstrap 3
